RESTART GRINDING**
every 6 coffee and
automatically stops
when the doser is full

Strong and compact coffee grinder doser with 64mm flat burrs. Its aluminum and steel body and the powerful 350Watt engine make it a reliable and indestructible work companion. The Automatic system allows always to be ready for a coffee, as the grinder automatically starts regrinding every 6 coffee and automatically stops when the doser is full. Thanks to the stepless micrometrical grinding adjustment, MST-64P AN ensures unmatched homogeneity of the grind.
